Highly structured patient management in rejuvenation, advances in skin tightening technology, tumor and reconstructive surgery, dermoscopy, basics of dermatologic surgery, AdipoStem cell treatment, fillers, neurotoxins, and much more will be yours to choose from. In Indonesia and all around the world, dermatologic surgery is practiced as an integral part of dermatologic services to patient on a daily basis. It has been proven that dermatologists have an undeniable excellent track record of safety using many office based procedures.
